Anchor Stranded Cotton 8m 4635000- # (Colour n°)

Embroidery

Easy

1 x #1, #47, #230, #239, #358, #361  
1 x Anchor Coton à Broder 25 #1  
1 x reel Anchor Metallic #300

1 x tapestry  
N° 24

Finished size: 17 x 35 cm  
Embroidery: 6.5 x 12.5 cm

## Bottle cover

### YARN USAGE

Anchor Stranded Cotton, worked with 3 strands.

### STITCH TECHNIQUE

Cross stitch and backstitch worked over 2 fabric threads each way.

### FABRIC

About 20 x 25 cm 25# evenweave fabric in white.

### NOTIONS

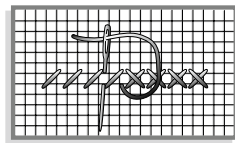

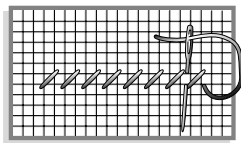

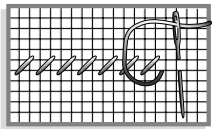

46 x 35 cm white felt (2 rectangles each 17 x 35 cm and a circle about 11 cm in diameter), matching sewing thread, 20 x 20 cm iron-on bonding material, 1 m red 25 mm ribbon.

### ALL YOU NEED TO DO

Neaten the raw edges of the fabric with zigzag stitch. Embroider the motif centrally onto the fabric. Work a simple hem-stitch border about 2.5 cm away from the embroidery and then fringe the fabric edges for 1 cm. Place the embroidery as you wish onto one of the two felt rectangles and secure with a few stitches or apply to the felt using iron-on bonding material. When the motif has been applied, place the two felt rectangles together and stitch the long sides together about 1 cm away from the edge. Finally, with seams towards the outside, insert the circle to form a base.

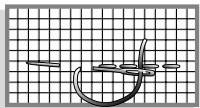

### CROSS STITCH

Cross stitch is worked in two stages – first work the lower stitch (from left to right) and then work the upper stitch (from right to left).

### BACKSTITCH

Backstitch is worked from right to left.

### TIP

Always work cross stitch with a Tapestry needle! Always work the cross stitch first and only then work the backstitch or straight stitch. Each square on the chart represents one cross stitch.

### WASHING INSTRUCTIONS

All our threads are produced in accordance with Oeko-tex standards. PH values are tested and all our colors dye lots adhere to Global fastness standards. However, it is important to follow our thread washing instructions. Particularly with dark colors, excess dye can remain on the thread. To minimize any potential bleeding of excess dyestuff it is important to wash the products in THE HOTTEST TEMPERATURE possible, in accordance with the specifications of the fabrics, and use a large amount of water. Please make sure that you also follow the fabric washing instructions. As a precaution, you can also use decolorating sheets that you can find in any supermarket.
