Anchor Stranded Cotton 8m No. 4635000- # (Colour n°)

Embroidery

1 x #01044 #00268 #00267 #00266 #00013 #00020 #00019
Anchor Lamé 8 m - # (Colour n°) 1 x #00300

Intermediate

N° 5-7

22 cm

Christmas embroidered wreath

MATERIAL USED:

Natural linen fabric
4" and 8" embroidery hoops
Satin ribbon 40 cm
Scissors
N° 5-7 embroidery needle
Anchor stranded cotton 8 m and Anchor lamé 8 m Embroidery floss

STITCHES USED:

Please refer to the sketch to reference the stitches used and the number of strands used. In the embroidery pattern the color code of Anchor Embroidery Floss is indicated by "#".

INSTRUCTIONS:

Print the pattern.
Trace the pattern onto the fabric (see tips for transferring patterns).
Double hoop assembly. Put the fabric on the 4" embroidery hoop and tension it well. Then turn around and place the 8" embroidery hoop.
Embroider branches, stems with stem stitch and leaves with fishbone stitch.
Embroider poinsettia with long and short stitch. Embroider center with french knots.
Embroider holly leaves with long and short stitch.
Embroider red flowers with french knots.
Sew a satin ribbon.
Cut the fabric from the central part of the crown and glue or sew to the inside of the frame. You can finish the back sewing a felt circle or gluing a scrapbook paper.

TRANSFERRING PATTERNS:

There are several methods for transferring embroidery designs to fabric. Different ways work better for different types of fabric.
Light method (this method works for light-weight and light-colored fabrics). Tracing patterns using a light table or a window. Tape embroidery design to a table or window and secure the fabric over it so you can see the pattern lines through the fabric. For tracing pattern you can use a water-soluble fabric marker or an ordinary pencil.

Carbon paper method (this method works for darker colored fabrics). Place your fabric on a hard surface, set a piece of carbon paper on top of it (use a color carbon paper that contrasts the color of fabric) and the pattern on top of that. Trace the pattern lines with a pencil.

Silk paper method (this method works well for thick fabrics like felt). Trace the pattern onto silk paper, pin the paper to the fabric, and stitch right through the paper and the fabric together. When you finish remove the paper.

WASHING INSTRUCTIONS:

All our threads are produced in accordance with Oeko-Tex standards. PH values are tested and all our colour dye lots adhere to Global fastness standards. However, it is important to follow our thread washing instructions. Particularly with dark colors, excess dye can remain on the thread. To minimise any potential bleeding of excess dyestuff it is important to wash the products in THE HOTTEST TEMPERATURE possible, in accordance with the specifications of the fabrics, and use a large amount of water. Please make sure that you also follow the fabric washing instructions where appropriate. As a precaution, you can also use decolorating sheets that you can find in any supermarket.
