Embroidery

Easy

Necklace Top

Step 1

Take your top and place front side up.

Step 2

Trace the necklace pattern onto the top in the required position, the pattern starts at the shoulder seams of the top and central from the sides (see the tips for applying the patterns to the garments).

Step 3

You can now begin the embroidery. Stitch the chain lines in chain stitch and the flowers in lazy daisy. Use the stitch instructions to guide you through the techniques.

WASHING INSTRUCTIONS

All our threads are produced in accordance with Oeko-tex standards. PH values are tested and all our colors dye lots adhere to Global fastness standards. However, it is important to follow our thread washing instructions. Particularly with dark colors, excess dye can remain on the thread. To minimize any potential bleeding of excess dyestuff it is important to wash the products in THE HOTTEST TEMPERATURE possible, in accordance with the specifications of the fabrics, and use a large amount of water. Please make sure that you also follow the fabric washing instructions. As a precaution, you can also use decolorating sheets that you can find in any supermarket.

General recommendations for freestyle embroidery projects

The garments that we have chosen to embroider are suggestions and can be substituted onto any garment of your choice.

Fabric: avoid sheer, satin, silk, open weave or open knit fabrics.

Needle: Milward embroidery needle size 9.

Embroidery hoop: use wherever possible.

The patterns: the patterns are to the correct size for tracing.

Tips for applying the design pattern to your garment are as follows:

1. Use dress makers carbon paper to trace the pattern onto your garment. The carbon paper is available in different colours so select a colour that will stand out from the fabric. The outline cannot be washed out so ensure that the line is fine and that the embroidery covers it well.
2. Place the design on a lightbox underneath your garment and trace the design onto the fabric using water soluble pen or pencil.
3. Use the design outline as a template and draw around the design using water soluble pen or pencil
