# General Information

It is essential to work to the stated tension to ensure success and you should always start by knitting a tension square before knitting the full garment.

If you have too many stitches to stated tension, your tension is too tight and you should change to a larger needle. If there are too few stitches, your tension is too loose and you should change to a smaller needle. Please check individual patterns for tension before starting the garment.

Instructions given are for the 1st size, with larger sizes in brackets. Where only one figure or instruction is given, this applies to all sizes. Work all directions inside brackets to the number of times stated.

### PATTERN NOTE

When working motifs we recommend you use the intarsia method with small amounts of the fair/isle stranding technique in order to avoid yarn floats across the back of the work that little fingers may get caught in. Where you have to carry yarn across the back of your work we recommend catching in it your work every 2/3 stitches.
